A MINI PROJECT REPORT ON  
**“TRAVEL KEEDA”**

Submitted By:

**Niraj Shah (11)**

**Ashish Shukla (23)**

**Abhishek Singh (24)**

Supervisor:

**Prof. ODILIA GONSALVES**

Department of Information Technology

Year:2019-20

**ATHARVA COLLEGE OF ENGINEERING**  
MALAD(W), MUMBAI-400095  
YEAR:-2019-2020

**CERTIFICATE**

This is to certify that

**Niraj Shah(11)**  
**Ashish Shukla(23)**  
**Abhishek Singh(24)**

Have submitted the Mini Project report for the requirements of the Bachelor  
Engineering In Information Technology satisfactorily  
On

**“Travel Keeda”**

As prescribed by the University of Mumbai Under the guidance of

**Prof. Odilia Gonsalves**

**H.O.D.**

**COLLEGE SEAL**

**EXTERNAL EXAMINER**

## **Approval for T.E. Mini Project Report**

This project report entitled “ **Niraj Shah(11), Ashish Shukla(23), Abhishek Singh(24)**” is approved For the degree of Bachelor of Engineering in Information Technology

**Mini Project Guide:-----**

**(Odilia Gonsalves)**

**Date:**

**Place:**

## **“DECLARATION”**

We declare that this written submission represents our ideas in our own Words and where others' ideas or words have been included, we have adequately cited and referenced the original sources. We also declare that We have adhered to all principles of academic honesty and integrity and have not misrepresented or fabricated or falsified any idea/data/fact/source in my submission. We understand that any violation of the above will be cause for disciplinary action by the Institute and can also evoke penal action from the sources which have thus not been properly cited or from whom proper permission has not been taken when needed.

## **ABSTRACT**

Tourism can be considered as most favorite pass time when people get free time. So while searching for different places in cities online it becomes repetitive task for searching about each place and traveller may miss out some important place to visit.

The website will help a user to find various unexplored places in a city which finding manually becomes a tedious task. This project will help tourist to suggest the best hotels among all the hotels deals on the web. Also one can find a destination based on themes so a user can find a desired destination according to his needs. Also one can find pinpoint location and accurate navigation to that place. It is a one stop solution for all your travel needs.

# **Chapter I**

## **1.1. Introduction**

Travel Keeda is an online travel guide. Travel Keeda is an application which connects travelers and traveling places of various destinations where travelers are finding the traveling places is very easy. This web-side provides details about the entire traveling places specification for best place for any city.

Travel Keeda is a web application built application. It provides the travelers ability to register to this application and search for place any city they want to travel. Each travelers will have their own account with their own home page. On the other hand Quick suggestion for hotel and also it's booking link.

Travel Keeda can add places where we want to travel and these places can be seen by various travelers. Main aim of this web application is to make a good web application that can make this traveling places of various destinations search option easy and accessible to everyone who is interested.

## **1.2. Problem Statement**

- Finding places to visit in a city manually offline becomes a tedious task for the traveller.
- While searching for different places in cities online it becomes a repetitive task for searching about each place and traveller may miss-out some important places.
- The Purpose of this website is to save time of DIY travellers by providing information in a single platform.

### **1.3.A. Aim**

- The purpose of this website is to provide information of the places of various destinations.

### **1.3.B. Scope**

For a growing internet population, the website would be helpful to reach every single traveller all over the world. More number of visitors will increase the business by leaps and bounds.

## **1.4. Objectives**

- To provide information about multiple places at various destinations.
- Pin Point of location on a map for navigation purpose.
- Feedback about a place from users.
- Users can help adding different places and also provide information about unexplored destinations.

- Help saving time and effort.
- Quick suggestion for hotel and also it's booking link.

## **Chapter II**

### **2.1. Hardware Requirements**

PC with following configuration

- Windows XP minimum
- RAM 518MB or higher
- Hard disk 1GB minimum
- Processor of 1GHz or above
- Internet Connection

### **2.2. Software Requirements**

- Web Browser
- Tool – Notepad
- OS- Windows 10
- HTML,CSS,PHP
- Local Host

### **2.3. Other Requirements**

Internet Connection and Installation of web framework.

## Chapter III

## **4. Chapter IV**

### **4.1. Conclusion**

This project will help to suggest the best Places to visit among all the tourists attraction at a destination. In this, a user will be able to select a hotel for a particular place. This makes easy for the user to choose the best tour as per their requirement. Helps the user to save time and effort instead of navigating to other websites to find information about a place. Finally, the goal of the project is to make an efficient system which is effective in terms of cost and money
